Engineered for Professional Yacht Operations

What is MMI Damage Control Kit

The MMI Damage Control Kit is a compact, professional-grade onboard emergency response system designed to support immediate action during minor incidents, damage events, or unexpected failures.

Built for real-world superyacht operations, the kit provides a practical and organised solution for carrying essential damage-control and emergency-repair equipment in a durable, transportable format.

Product Features

- Compact, durable protective case format
- Designed for rapid deployment in an emergency
- Organised layout for quick access and identification
- Suitable for onboard storage in tenders, garages, lazarettos, chase boats, and support craft
- Professional-grade presentation aligned with premium vessel standards
- Built for marine environments and crew usability
- Available in standard and upgraded "Limo Edition" configurations

Contents include:

- Emergency sealing and temporary repair materials
- General-purpose fastening and securing items
- Cutting and handling tools
- Waterproof containment / storage components
- Essential onboard incident-response accessories
- Organised internal layout for fast identification and deployment

Housed in a genuine Peli™ 1500 Protector Case, chosen for its proven durability and suitability for demanding onboard environments. Internally, the case features a photographic lid organiser for quick visual reference, along with a custom-configured TrekPak divider system designed specifically around the kit contents to ensure secure stowage and fast, intuitive access to each item.

Finished in high-visibility orange for immediate recognition in emergency situations, the case also features a laser-printed lid and engraved handle nameplate for clear identification when stored onboard.

Developed in partnership with Peli Products UK.

Damage Control Kit – Limo Edition

The Damage Control Kit – Limo Edition builds on the standard DCK platform with additional premium emergency response tools selected specifically for limousine tenders, guest operations, and high-visibility support craft where both rapid response and passenger reassurance are critical.

This upgraded version includes specialist rescue and emergency navigation equipment to support safer incident management, improve visibility, and assist crews in maintaining control until the vessel can reach safe harbour or further assistance arrives.

Additional Contents

In addition to the standard Damage Control Kit contents, the Limo Edition includes:

Leatherman Raptor Rescue Shears	Multifunctional portable All-round white Navilight with magnetic base in rescue color	Navisafe Navilight 360° Tricolor Navigation Light (Suction Mount)
